EAT 4 LIFE · WEEKLY EMAIL REPORT

Oct 5 – Oct 12

✅ WHAT WORKED

- Three broadcasts went out (~2,000 sent each): "They had the degree. They're working retail." (2050), "You're charging like a freelancer" (2035), "The layoffs aren't coming for you" (2023). Last week had none.
- "They had the degree. They're working retail." in the workflow: 1 of 2 opened, the only open in the workflow table (last week's only engaged email was "Welcome to the executive table, Burnett").
- Form submissions rose to 2 from 1: both on "Free Eat 4 Life Training Sign Up".

⛔ WHAT DIDN'T

- Broadcast failures: 355 of 2050, 385 of 2023 and 376 of 2035 failed to send. Broadcast opens and clicks are absent (401, token lacks the email-stats scope), so they are unknown, not 0%.
- Workflow: 17 of 18 subjects show 0 opens and 0 clicks. "I created 90 days of content in 3 hours", "He kept asking for the blueprint" and 4 other subjects had 3 sends each, all 0 opens.
- 0 appointments booked. 0 pipeline movement this week, versus 1 move ($37) last week. 338 of 368 E4L leads were at "New Lead" last week; still stuck in the E4L pipeline per the hygiene list.

→ CHANGE THIS WEEK

- Find why about 1 in 6 broadcast recipients fail (355-385 per send) and fix it before the next broadcast. Then add the email-stats scope to the Students token so broadcast opens and clicks show up.

PIPELINE MOVEMENT

Nothing changed stage this week.

⚠️ PROBLEMS DISTORTING THESE NUMBERS

- Paused campaign still holding 1227 queued contacts: "Feb 4th - The day you stop trading time for money" (2026-01-28)
- Pipeline "Chris Power dialer": source is split by casing — "11 Digital Careers - Sales Funnel" vs "11 digital careers - sales funnel" — attribution counts are being divided.
- Pipeline "E4L": 3 opportunities sit in a paid stage with $0 recorded — revenue from email can't be reported until values are entered.
- Pipeline "E4L": 338 of 368 (91.8%) still at "New Lead (Ebook/ads/etc)" — the pipeline isn't being worked, so stage-based conversion will read as zero.
- Pipeline "E4L": source is split by casing — "11 Digital Careers - Sales Funnel" vs "11 digital careers - sales funnel" — attribution counts are being divided.
- Pipeline "E4L": source is split by casing — "Xbox to Executive - Optin Form" vs "xbox to executive - optin form" — attribution counts are being divided.

Data gaps: Campaign open/click totals need the email-stats scope on this token (endpoint exists, returned 401).

Agency (E4L Services)

⚠️ **Not pulled.** no API token configured for this sub-account.

Numbers come straight from GHL's API, read-only, every Monday. Full data and history live in `reports/email/` in the repo. If a number looks wrong, the data file will show why.
