

Sep 10 – Sep 17

✓ WHAT WORKED

- Delivery is clean. 145 workflow emails went out, 145 delivered, 0 bounced. The student domain is healthy.
- Volume is steady: 21 subject lines running through the nurture workflows. "You already have the obsession" (35 sends) and "The 4-week AI implementation plan" (27) carry most of it.

✗ WHAT DIDN'T

- Nothing converted. 145 emails → 0 form submissions, 0 appointments, 0 pipeline stage moves. In 7 days the student email machine produced nothing we can measure.
- We're blind on opens and clicks. GHL's per-message status only ever says "delivered." The real open/click numbers sit behind a stats endpoint our token can't read (401 = it exists, wrong scope). So we can't tell if the problem is subject lines (nobody opens) or content (they open, don't click).
- No email gets credit for anything. Purchases and bookings only tie back to an email when the link carries `utm_source=email`. Ours didn't. Fixed going forward.
- 338 of 367 pipeline leads (92%) have never left "New Lead." A paused January campaign is still holding 1,227 queued contacts — un-pause it by accident and 1,227 people get a February email in September.

→ CHANGE THIS WEEK

- Get the email-stats scope on the GHL token. Until then every report is a delivery report, not a performance report.
- Delete the paused "Feb 4th" campaign.

SUBJECT LINES

SUBJECT LINE	SENT	DELIVERED	BOUNCED
You already have the obsession	35	35	0
The 4-week AI implementation plan every startup needs	27	27	0
Your competition is asleep	12	12	0
You don't need more hours. You need better leverage.	12	12	0
Entrepreneurs are basically gamers	12	12	0
This isn't about money	11	11	0
Your first client is built, not found	7	7	0
The job path is outdated	7	7	0
You already know how to win	3	3	0
Money is feedback	2	2	0

...and 11 more subject lines with fewer sends. Full list in the archive.

ⓘ Opens and clicks aren't in this table. GHL's per-message status only records delivery. They appear once the token has the email-stats scope.

PIPELINE MOVEMENT

Nothing changed stage this week.

⚠ PROBLEMS DISTORTING THESE NUMBERS

- Paused campaign still holding 1227 queued contacts: "Feb 4th - The day you stop trading time for money" (2026-01-28)
- Pipeline "Chris Power dialer": source is split by casing — "11 Digital Careers - Sales Funnel" vs "11 digital careers - sales funnel" — attribution counts are being divided.

- Pipeline "E4L": 3 opportunities sit in a paid stage with \$0 recorded — revenue from email can't be reported until values are entered.
- Pipeline "E4L": 338 of 367 (92.1%) still at "New Lead (Ebook/ads/etc)" — the pipeline isn't being worked, so stage-based conversion will read as zero.
- Pipeline "E4L": source is split by casing — "11 Digital Careers - Sales Funnel" vs "11 digital careers - sales funnel" — attribution counts are being divided.
- Pipeline "E4L": source is split by casing — "Xbox to Executive - Optin Form" vs "xbox to executive - optin form" — attribution counts are being divided.

Data gaps: Opens and clicks are NOT in these numbers: the per-message status field only records delivery. Bulk-campaign opens/clicks need the email-stats scope; workflow-email opens are UI-only.

Agency (E4L Services)

 **Not pulled.** no API token configured for this sub-account.

Numbers come straight from GHJ's API, read-only, every Monday. Full data and history live in `reports/email/` in the repo. If a number looks wrong, the data file will show why.
